

Common Core: More Tests, But Not Better

Classrooms deluged by **more tests in more grades**

Continued harm from **test score misuses** (dropouts, unfair teacher and school ratings)

Tests remain primarily **multiple choice**

Cash-pinched schools must choose between teachers or computerized testing; same **error-prone testing companies** make huge profits

Harder tests do not make kids smarter:
raising the bar does not make kids jump higher

Needed:
Less testing, no high stakes, better assessments
