

U.S. COMPUTERIZED TESTING PROBLEMS: 2013 - 2019

compiled by National Center for Fair & Open Testing (FairTest)

The ongoing litany of computer exam administration failures reinforces the conclusion that the technologies rushed into the marketplace by political mandates and lobbying by the companies paid to implement them are not ready for prime time. It makes no sense to attach high-stakes consequences to such deeply flawed tools

Updates to this list will be posted at: <http://fairtest.org/computerized-testing-problems-chronology>
